

# VKO QUIETLINE

150mm Axial Inline Fan

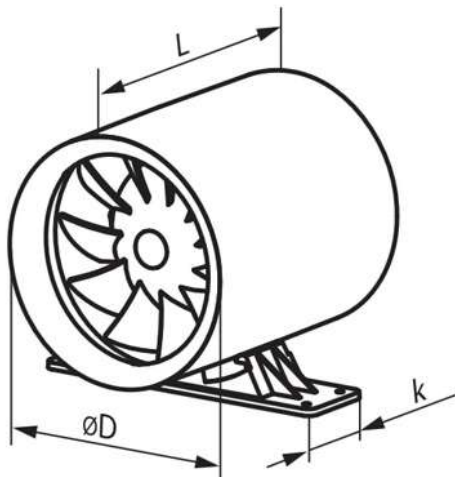

The Fanco VKO Quietline Axial Series features anti vibration technology and is designed to supply and exhaust ventilation in rooms at a very low noise level

## ■ Pressure Curves

## ■ Dimensions (mm)

MODEL	L	D	K
VKO QUIETLINE 150	182	150	154

## ■ Features

- Innovative stylish extract or supply fans for enhanced comfort level.
- Continuous or periodic ventilation of bathroom, showers, kitchens and other utility spaces.
- Maximum air flow combined with low noise level ensures an ideal room microclimate.
- Exhaust or supply ventilation depending on fan installation in the system.
- Designed for plastic (flexible) ducts.
- Transportation of low and medium air flow volumes for small distances at low air resistance in the ventilation system.
- Compatible with 150 mm air ducts.

## ■ Design

- The casing and the impeller are made of high quality durable plastic.
- The exhaust spigot is fitted with specially designed air flow rectifiers to reduce air turbulence, noise level and increase air pressure.
